Career Overview

Having more than 8 years of experience in IT industry which includes Web Designing , UI Designing Front End Development and responsive UI development. From last few years of my career I got a good exposure to cutting edge front end technologies such as HTML5, CSS3, Jquery, Bootstrap compliant websites and related technologies. I have worked on latest trends of HTML5 web design such as Parallax and One page website. I have proficiency in CSS3, HTML5 and XHTML compliant websites; proficiency in DIV based Table less website designing. I have Strong Understanding of W3C validated, semantic and syntactic HTML5/CSS3 coding & developed HTML pages with different browser and devices compatibility. I have understanding of levels of accessibility. I have strong conceptual skills and proven ability to create interactive prototypes and/or mock-ups. I have also good hands at Joomla (CMS) and Wordpress.

Career Objective

To osculate the summit of professional excellence. Seeking a challenging & growth oriented position that leads to further growth in my professional career & personal satisfaction by utilizing my skills & ability to work for the growth of an organization.

Areas of Expertise
